⬡ Paradroid.exe	15/05/2024 21:35	Application	651 KB
⬡ UnityCrashHandler64.exe	15/05/2024 21:35	Application	1,116 KB
📄 UnityPlayer.dll	15/05/2024 21:35	Application extens...	48,490 KB
📄 WinPixEventRuntime.dll	15/05/2024 21:35	Application extens...	33 KB

4) You may need to confirm in Microsoft Defender or equivalent that you want to run this app. (Click "More info" if there is only a "Don't Run" button)

5) The game should run and take you to the main menu.

6) Start a new game at your chosen difficulty by using one of the New Game buttons.
On harder difficulties, you have less health as the paradroid and the enemies are tougher to kill.

7) During the game, you can use WASD to move, E to take over an enemy robot or to use the teleporters, left click to fire at enemies, and in the quiz menu, W and S to change options with X to lock in your answer.
The fastest time to win the game on "Hell Mode" difficulty as of 16/05/24 is 70.9 seconds, let us know if you can beat this!

8) Be careful on the third and final level because one of the teleporters leads to an alternate ending!
